25X1X6

1. The Nitramonia factory near Fagaras is working at full capacity manufacturing explosives, while the Apretura cotton thread factory at Popesti-Leordeni near Bucharest is said to have been converted to a similar purpose.
2. There is a great necessity for spare parts for the existing industrial and textile machinery as well as for equipment for industrial expansion. The I.A.R. tractors, for example, cannot be used because of the lack of accessories, while the production of sewing machines by the Cugir factory has been confined to exhibition models.
